Notes:

- Add README file with the steps of configuring your app and running it
- Use Git version to preview your project

Requirements:

- Create Scalable Components based on **Typescript** By using **React**
- Use **React Hooks** as much as possible
- Consider the project to be **Scaleable**
- Create responsive design
- Don't use CSS frameworks (Only SCSS/SASS or CSS-In-JS)
- if you use SCSS/SASS, follow the guidelines mentioned bellow
- head bar:
- in mobile it will be scrollable
- in desktop it will be fixed
- the main page:
- is a search page /search?query={txt}

In mobile:

- it will look like the images , has header, filters, and body
- the header contains logo search text and search icon
- when u click on the search key the search text will convert to search input
- the loading will be like the loading in the images

In desktop:

- the header is fixed when scrolling
- the header has the logo and the search controllers
- the second header had the results count and the filters button
- when u search (write in textbox and press enter or click the search button) the loading bar will appear .

Use Youtube APIs:

the search Api https://developers.google.com/youtube/v3/docs/search/list

Preferred:

- Use git and make sure the commit messages make sense
- try to use CSS and js linters be consistent in the way of writing your code
- Use Flux Arch

Guidelines

- BEM,& SCSS in writing you scss code.
- css guideline:
- http://cssguidelin.es/ .
